

DESCRIPTION

High-quality sun-cured alfalfa hay with excellent protein levels, digestible fiber, and natural vitamins and minerals. Provides a consistent and nutritious forage source for livestock.

NUTRITIONAL INFORMATION

	PROTEIN	MOISTURE	RFV	COLOR
Supreme	22% min	14% max	185 min	Green
Premium	20% min	14% max	170 min	Green
Good	18% min	14% max	150 min	Green
Fair	16% min	14% max	130 min	Green

SUITABLE FOR

Ideal for dairy cows, beef cattle, sheep, goats, horses, and camelids. Common uses include improving forage quality in rations, supporting high-producing animals, enhancing body condition, and providing a reliable fiber source in both grazing and confined...

STORAGE | SHELF LIFE

Store in a dry, ventilated area protected from rain and ground moisture. Keep bales elevated and covered to prevent mold development and nutrient loss. When stored properly, alfalfa hay maintains quality for up to one year.

PACKAGING | LOGISTICS

Loaded in 40 ft high cube containers in compressed bales to optimize space and handling efficiency. Shipments are secured to ensure stability and preserve bale integrity throughout international transport.

ORIGIN | AVAILABILITY

Argentina

JAN - FEB - MAR - APR - MAY - SEP...
