

DESCRIPTION

Whole cottonseed obtained after the ginning process, naturally rich in oil, fiber, and protein. A high-energy feed ingredient widely used in ruminant nutrition.

NUTRITIONAL INFORMATION

Protein	18% min
Moisture	12% max
Fat	20% max
Ash	7% max
Foreign material	3% max
Damaged seeds	2% max
Color	Natural cottonseed color

SUITABLE FOR

Suitable for dairy cows, beef cattle, and small ruminants when used at appropriate inclusion rates. Common uses include increasing energy density in rations, supporting milk production, improving body condition scores, and enhancing overall diet palatability.

STORAGE | SHELF LIFE

Store in a cool, dry, and well-ventilated location. Protect from moisture to prevent mold, heating, or quality degradation. When stored correctly, cottonseed maintains its nutritional properties for up to six months.

PACKAGING | LOGISTICS

Loaded in 40 ft high-cube containers in bulk. Containers are conditioned with VDry anti-humidity blankets and moisture-control liners to reduce condensation and protect the product during the international voyage, ensuring clean and secure handling.
