

DESCRIPTION

Clean and selected green mung beans used as a high-quality protein and energy source in specialized animal feed formulations.

NUTRITIONAL INFORMATION

Purity	99% min
Moisture	13% max
Damaged	3% max
Mouldy	1% max
Attached cuticle	4% max
Size	3 mm
Color	Green

SUITABLE FOR

Recommended for poultry, swine, dairy cows, beef cattle, sheep, goats, and aquaculture. Common uses include boosting plant protein, replacing other legumes, improving energy and nutrient supply, and supporting balanced amino acid profiles.

STORAGE | SHELF LIFE

Store in a cool, dry, and ventilated facility. Protect from humidity, insects, and rodents to maintain grain integrity. When properly stored, green mung beans preserve their quality for up to one year.

PACKAGING | LOGISTICS

Shipped in bulk in 20 ft or 40 ft containers. Containers are conditioned with moisture-control systems such as absorbent blankets and protective liners, which help minimize condensation and maintain product quality during long-distance transport.

ORIGIN | AVAILABILITY

Paraguay

FEB - MAR - APR - MAY - JUN - JUL

Bolivia
